

A close-up photograph of a white, branching coral structure against a dark background. The coral has a complex, porous texture with many small openings. The lighting is dramatic, highlighting the intricate details of the coral's surface.

Madespa

Acrylic teeth
PMMA discs

Ecolux

Two-layer acrylic teeth

Features and benefits:

Ideal for daily use.

Simple and effective articulation.

VITA shading.

The two-layer ECOLUX teeth are manufactured using Double Cross-Linking (DCL) and high molecular weight methyl methacrylate polymer, employing the most modern techniques and under strict quality control.

3lux

Three-layer acrylic teeth

Features and benefits:

Natural aesthetics.

Wear resistance.

VITA shading.

3LUX teeth are manufactured using Double Cross-Linking (DCL) and high molecular weight methyl methacrylate polymer, with the most advanced techniques and under strict quality control.

Pentalux

Five-layer acrylic teeth

Features and benefits:

For the most demanding cases.

High abrasion resistance.

Highly durable prostheses.

Patient comfort.

PENTALUX five-layer teeth are manufactured using Double Cross-Linking (DCL) and high molecular weight methyl methacrylate polymer, employing the most advanced techniques and under strict quality control.

PMMA Block

PMMA discs for CAD-CAM milling machine

Features and benefits:

High aesthetics.

Natural gradient (multilayer).

Biocompatible.

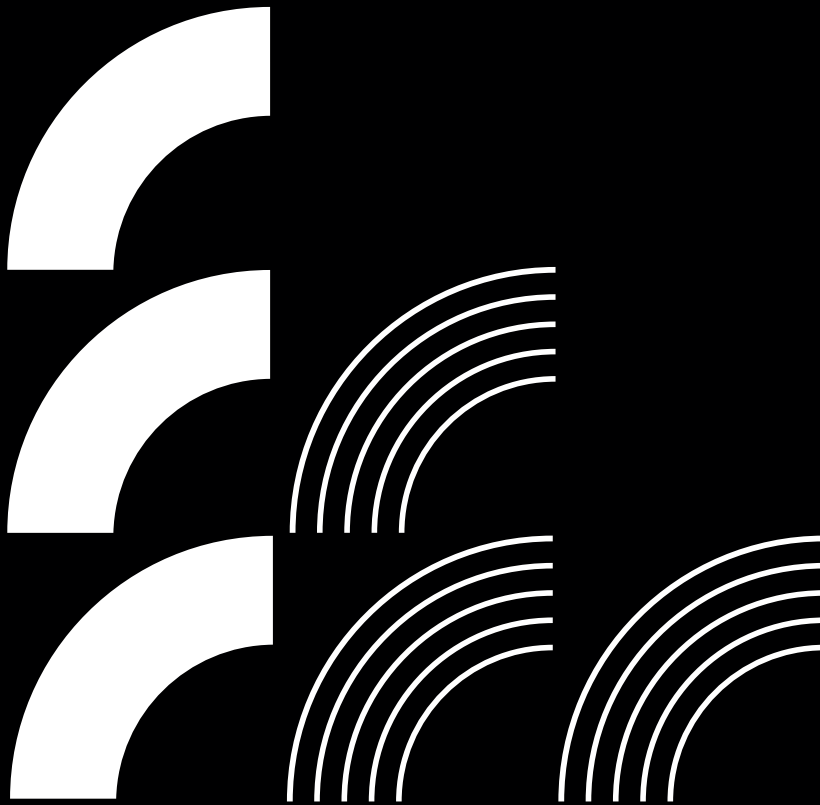

Excellent milling and high stability.

VITA shading.

Diameter: 98 mm.

Thicknesses: 16/20/25 mm.
